

3D printed food to improve the life of Dysphagia patients

What is Dysphagia

Dysphagia is the medical term used to describe having difficulty swallowing. Over one million Australians suffer from Dysphagia

Adapted diet for Dysphagia

A diet for a person suffering from dysphagia needs to have a certain texture similar to a pureé, to make it easy to swallow.

Improve Dysphagia diets with 3D printed food by Foodini

Appearance of food is as important as taste.

Foodini creates adapted menus that are still tasty, healthy and appealing.
